

KABA®

Kaba expertT

For your personal security and convenience

Proven Reversible Key Technology

Cross section

Kaba expertT is a cylinder system with four tumbler pin rows, that is suitable for master key systems and keyed alike lock cylinders.

The Kaba expertT system meets the requirements of EU Norm EN1303 key related security grade 6 and is burglary resistant according to DIN 18252, grade P3. Kaba expertT lock cylinders are also safe against the "Bumping Method", which has caused great concern.

Ergonomically Correct Reversible Key System

With Kaba reversible keys the key is inserted vertically, ergonomically correct, into the keyway. Thanks to reversible key technology the key may be inserted in either position.

Ergonomic reversible key system

Kaba expertT standard key with blue clip

Kaba Key Milling

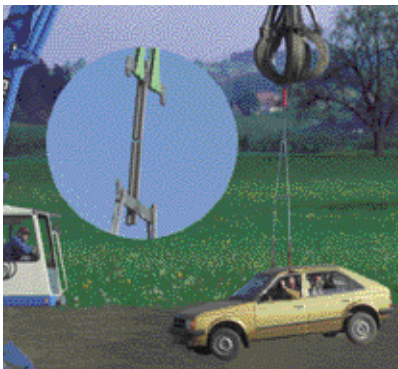

Kaba expertT keys are manufactured in a CNC controlled milling process that guarantees highest precision. They are characterized by a high security level, minimum wear and are absolutely reliable. The expertT has been tested for 1 000 000 cycles without failure.

Kaba Steel Lock Cylinders

Kaba expertT lock cylinders can be supplied optionally with a steel housing and additional special hard metal tumbler pins. This provides high protection against tearing off cylinders.

For Your Personal Security

duplicate keys may only be produced by authorised Kaba dealers.

Investment Security

Kaba expertT lock cylinders are built in a modular system. This makes it possible to modify cylinders simply and quickly by authorised Kaba dealers. The modular design increases the flexibility of the system and provides the highest level of investment security.

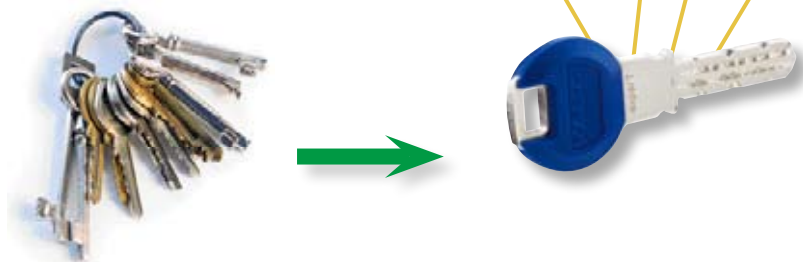

Upward Compatible

Kaba expertT cylinders are upward compatible to the mechatronic Kaba eologic system. By exchanging the clip on the key bow, a mechanical key becomes an electronic access control medium.

12 different colored key clips provide discernibility

Keyed Alike Lock Cylinders or Master Key Systems

The Key System for Your Home

Kaba experT makes it possible to assign access privileges for your private home, business or practice. You define, who may have access where and with which key.

One Key for All

The Kaba experT system can be used in all types of lock cylinders (double and single cylinders, thumbturn cylinders, furniture locks, padlocks, switches, etc.).

Our specialty: You can order your lock cylinders so that they all can be opened and locked with a single key (keyed alike lock cylinder).
